Subject Index

Acridine phosphorescence spectra, heterogeneity in DNA-associated solvent mobility from, 1673
Agarose, aqueous, sol-sol structural transition of, 2254
—, optical activity of, 959
—, sulphate, molecular organization in, 1009
cyclo-di-(Alanyl), conformational preferences in, 794
Albumin, IR amide I bandwidth of, bound water and, 639
Alkyl amides, crystalline, millimeter-wave investigation on, 677
Amide A, vibrational CD of poly(L-tyrosine), 5
Amide I, bandwidth of albumin, bound water and, 639
—, vibrational CD of poly(L-tyrosine), 5
Amide II, vibrational CD of poly(L-tyrosine), 5
Amino acid sequence, prediction of protein structural class from, 1659
1-Aminocyclopentanecarboxylic acid (Acc^5), stereochemistry of peptides containing, 1635
Aminoisobutyric acid, vibrational CD of octapeptides containing, 79
α-Aminoisobutyric acid peptides in solution stereochemistry of, 2209
Aneomonia sulcata, resonances in the ^{1}H-nmr spectrum of polypeptide toxin I from, 489
Anisotropic swelling of DNA films, 765
Antibiotics, lipopeptide, conformation of iturin A, 153
Apo-forms of LADH, 1384
Arginine, sequential polypeptides containing, 655

Bacteriophage ϕ6, CD of intact phage, 171
—, CD of nucleocapsid, 171
Bacteriophage T7 DNA, ethidium binding to, 1345
Base-stacking in dinucleoside monophosphates, 17
Base tilts, of B-form poly[d(G)]-poly[d(C)] and the B- and Z-conformations of poly[d(GC)]-poly[d(GC)] in solution, 2333
—, question of, 885
N-Benzyloxycarbonyl homo-tripeptide, x-ray diffraction analysis of, 2237
Biopolymer-water interactions, thermodynamics of, 1967
Block copolypeptides, helix breakers in, 1449
Boc-Acc^6-Acc^6-NHMe, solution and solid-state conformation of, 1635
Bound water, IR amide I bandwidth of albumin and, 639
Bovine pancreatic trypsin inhibitor (BPTI), intermolecular distance distribution of, 235
—, reductive alkylation of, 1644
Bovine serum albumin, SANS studies of, 1156
Bovine β-trypsin, kinetic binding of PSTI to, 2323

Calcium (Ca^{2+})-binding proteins, carbocyanine dye and, 1579
Calcium-induced gelation, chain association of pectic molecules during, 455
Calcium ions, effect on calmodulin properties of, 351
—, interaction with gastrin analogs of, 135
Calmodulin, effect of calcium ion on, 351
—, physical properties at 37° C of, 351
Calorimetric studies of P(-)TDHA, 787
Carbocyanine dye, Ca^{2+}-binding proteins and, 1579
Carbon monoxide, partitioning to hemoglobin A_0 of oxygen and, 1381
Cartilage proteoglycan, molecular weight of, 1095
Cationic porphyrins, effects on DNA of, 1837
Cations, divalent, effect on ^{23}Na-DNA line widths, 205
CD, of Ca^{2+}-gastrin interaction, 135
—, of calmodulin at 37° C, 351
—, conformational changes of pinellin in solution using, 393
—, of des-trp^1, Asp^{3-7}, Leu^{12}-minigastrin, 229
—, of double-stranded RNA, 91
—, effect of salts and pH on, 61
—, in gels and suspension, 1359
—, of hydrophobic peptides, 1
—, of Leu-containing polytripeptides, 61
—, of phage ϕ6 and nucleocapsid, 171
—, of poly(L-DOPA) with pendant crown ethers, 189
—, of RNAs from transition-moment parameters, 1461
—, in soret region of sickle hemoglobin gels, 1359
—, of synthetic RNA, sequence-dependence of, 1735
—, *See also* Vibrational CD

CD probe with oligomers of polycationic amine, 407
CD spectra of low-salt Z-forms of poly(rG-DC) · poly(rG-dC) and poly(dG-m^{5}dC) · poly(dG-m^{5}dC), 519
Cellulose, structural variation of, 851
Chiral discrimination in energetics of diastereomeric adducts formation, 1249
β-Chitlin microfibrils, high-resolution electron microscopy of, 1599
Circular intensity differential scattering (CIDS) measurement, analysis of, 2043
5′-CMP, effect of monovalent cations on behavior of 5′-GMP and, 2149
Collagen fibrillogenesis, 1185
Collagen triple helix, influence of tripeptides on stability of, 1069, 1081
Conformation, of dioxopiperazines, 771, 794
—, of mucous glycoproteins, 1505
—, of polypeptides, 1547
—, of ribosomal 5S RNA, 1299
—, of single-stranded polynucleotides, 1419
—, of somatostatin, 1895
Conformational energy calculations , of bacterial lipopeptide, 153
—, of dinucleoside monophosphates, 17
Conformational transition, of double-stranded RNA, 91
—, salt-induced, of Leu-containing polytripeptides, 61
Connective tissue, macroscopic polarity of, 601
Copolypeptides, block, helix breakers in, 1449
Copper(II)-DNA complex, effect of uf uv radiation on, 217
Crosslinking protein gels, 31
Crown ethers, L-DOPA-derived, synthesis and complexation studies of, 189
Crystalline alkyl amides, millimeter-wave investigation of, 677
Crystal structure of DCMU and DTPU, 1615
Cytochrome c chimerae, from natural and synthetic fragments, 2121
—, semisynthesis of, fragment synthesis for use in, 2269

DCMU, crystal structure of, 1615
2,6-Diaminopurine, hydrogen-bonding to uracil (thymine) of, 257
Diastereomeric adducts, formation of, chiral discrimination in energetics of, 1249
Dielectric constant, of folded protein, 2097
—, temperature dependence in Na-DNA gels, 341
Difference VIS spectroscopy, study of adsorption of thionine on heparin by, 1273
Diffuse x-ray scattering, study of apo- and holo-forms of LADH by, 1384
Dinucleoside monophosphates, conformational energy calculations, 17
Dioxopiperazines, conformation of, 771, 794
Distamycin A, molecular orbital calculation on, 2065
Distribution of charged groups in proteins, 1717
Divalent cations, effect on ^{23}Na-DNA line widths, 205
DNA-associated glycol-water solvents, mobility of, 1685
—, -associated solvent mobility, 1672
—, binding of ethidium bromide to, 2187
—, Cu(II) complex, effect of $NaBH_4$ and uv radiation on, 217
—, diffusion of, in a gel under intermittent electric field, 1179
—, -drug interactions, molecular mechanics of, 249
—, duplexes, dinucleoside monophosphate models, 17
—, duplexes, sequence-dependent confirmation of, 693
—, duplexes, sequence-dependent recognition of, 707
—, effect of cationic porphyrins on, 1837
—, effect of silver(I) on, 1531
—, electric dichroism measurements of, 885
—, electrostatic stability of, effect of methylation on, 1697
—, enantioselective interactions of inversion-labile trigonal iron complexes bonded to, 1209
—, flexible coils, kinetics of nonspecific binding of proteins with, 985
—, fragments, association of, 1519
—, fragments, phosphorus nmr spectra of, 1803
—, gels, effect of salts on swelling of, 223
—, gels, hydration of Na-DNA gels, 241
—, helix, base composition and oxygen penetration of, 307
—, high molecular weight, scaled particle theory applied to, 2017
—, hydrated, positron annihilation study of, 1865
—, interactions, specificity in, 1997
—, mechanism for large anisotropic swelling of, 765
—, ^{23}Na-nmr counterion exchange study, 205
—, orientation during gel electrophoresis, 539
—, oriented films, anisotropic swelling of, 223
—, Pf1 virus particle dynamics, 1859
—, polymorphism of, 2279
—, recoil, temperature effects and solvent viscosity effect of, 291
—, rotational diffusion in polyacrylamide gels of, 2173
—, supercoiled, elastic model of, 2083
—, T7, ethidium's binding to, 1345
—, viscoelastic behavior of, 291
—, Z-, spectroscopic and electro-optic characterizations of, 2279
Double helix, parallel, 1603
DTPU, crystal structure of, 1615
Dynamic light scattering, fibral assembly *in vitro* using, 1185
—, thermal memory effect investigation using, 1185

Effusion rate through a polymer network, 811
Elastic model of highly supercoiled DNA, 2083
Elastomeric polypeptides, temperature-correlated force and structure development of, 1939

Electric dichroism (ED), measurements of DNA and GC nucleic acids in solution, 885
Electron microscopy, high-resolution, of β-chitin microfibrils, 1599
—, of protein gels, 31
Electrophoretic mobility, DNA orientation during gel electrophoresis and, 539
Electrostatic stability of DNA, effect of methylation on, 1697
Eledone cirrhosa, studies on the sperm cell of, 2043
Enantiselective DNA binding, 1209
Energy transfer in polynucleotide homopolymers and copolymers, 2307
Enkephalin, average backbone structure of, 1547
Enthalpies, solvent transfer, for proteins, 119
Enzymatic hydrolysis of (1 → 6)-α-DL-glucopyranan (DL-dextran), 1955
Equimolar mixture of 5′-CMP and 5′-GMP, effect of monovalent cations on behavior of, 2149
Ethanol, effect on RNA of, 91
Ethidium, binding to bacteriophage T7 DNA of, 1345
Ethidium bromide, binding to DNA of, 2187
—, fluorescence decay of, 507
Evolutionary similarity among peptide segments, 1565

Fibrillar collagen, multiple denaturation transitions in, 1875
Fibrin clots, interaction of fibrinogen-binding tetrapeptides with, 1315
Fibrin fibers, lateral packing of protofibrils in, 2357
—, protein in, 2373
Fibrin oligomers, gel formation of, 1337
—, interaction of fibrinogen-binding tetrapeptides with, 1315
Fibrin polymerization, geometrical abstraction of, 905
Fibrinogen-binding tetrapeptides, interaction with fibrin oligomers and fine fibrin clots of, 1315
Fibrinogen polymers, lateral packing or protofibrils in, 2357
—, protein in, 2373
Fibronectin, subunit arrangement in, 947
Fluorescence, intrinsic, conformational changes of pinellin in solution using, 393
Fluorescence decay of ethidium bromide, 507
5-Fluorouracil, effects on polyribonucleotide of, 571
Folding-unfolding transition of island-model proteins, 1815
Fourier transform ir (FTIR), deconvolved, examination of secondary structure of proteins by, 469

Gastrin analogs, interaction of calcium ions with, 135
—, synthesis, CD, and activity of, 229
Gel electrophoresis, DNA orientation during, 539
Gel formation by fibrin oligomers, 1337
Geometrical abstraction of fibrin polymerization, 905
Globular proteins, intramolecular distances in, 235
—, molecular cartography of, 863
—, stability of, 1623
—, three-dimensional structure of, 1109
(1 → 6)-α-DL-Glucopyranan(DL-dextran), enzymatic hydrolysis of, 1955
Glycol-water solvents, rate constants and activation parameters for mobility of, 1685
Glycoproteins, mucous, conformation of, 1505
cyclo(Glycyl-L-alanyl), conformational preferences in, 795
cyclo(Glycyl-L-phenylalanyl), conformational energy calculations of, 771
cyclo(Glycyl-L-valyl), conformational preferences in, 795
5′-GMP, effect of monovalent cations on behavior of 5′-CMP and, 2149
5′-rGMP, Raman spectroscopic study on, 753
Gramicidin S, analogs of, 2293
—, distance determination on, 977

Halogenated nucleic acids, effects on polyribonucleotide of, 571
α-Helical oligopeptides, synthesis and spectroscopy of, 1
3_{10}-Helix, vibrational CD of model octapeptides, 79
Helix → β conformational transition of poly(L-lysine) on dye binding, 2347
Helix breakers in block copolypeptides, 1449
Helix-coil transition, of poly(L-tyrosine), 5
—, of ribonuclease-S-peptide, 1031
Hemoglobin A_0, carbon monoxide-oxygen partition coefficient from, 1381
Hemoglobin $\alpha_1\beta_1$ subunit interface, shape complementarity at, 1229
Heparin, adsorption of thionine on, 1273
—, -thrombin interaction, effect of NaCl on, 527
High-resolution electron microscopy of β-chitin microfibrils, 1599
Hinge-bending mode of lysozyme-inhibitor complex, 1767
Histones, sequential polypeptides containing arginine as, 655
Holo-forms of LADH, 1384
Hydrated DNA, positron annihilation study of, 1865
Hydration of Na-DNA gels, 241
Hydrodynamic study of salt-induced polypeptide transition, 61
Hydrogen-bonding of thymine and uracil to modified bases, 267
Hydrophobic peptides, synthesis and spectroscopy of, 1

Intermolecular distances in globular proteins, 235
Intrinsic fluorescence, conformational changes of pinellin in solution using, 393
Ion-pairs, energy of dehydration of, 317

Ir, of hydrated protein films, 317
—, of hydrophobic peptides, 1
—, of substance P fragments, 281
Island-model proteins, folding-unfolding transition of, 1815
D-Isomeric replacements, 2029
Iturin A, conformational energy calculations for, 153

Kinetic binding of porcine pancreatic secretory trypsin inhibitor to bovine β-trypsin, 2323

L-DOPA with pendant crown ethers, 189
Lipopeptide, bacterial, conformational energy calculations for, 153
Liver alcohol dehydrogenase (LADH), apo- and holo-forms of, 1384
Lyso-phosphatidylcholine, H-nmr studies in, 2313
Lysozyme, conformation, 1133
—, crystals, growth of, 337
—, -inhibitor complex, hinge-bending, 1767
—, solvent transfer enthalpy for, 119
—, unfolding rate and structural fluctuations in, 1981

Macromolecular hydrodynamic models, 827
Macroscopic polarity of connective tissue, 601
α-Melanotropin, topological model for the solution conformation of, 2029
Melittin-sodium dodecyl sulfate complexes, 1493
—, in surfactant assemblies, 1259
Membrane-active peptides, interaction between membranes of, 1259
Met-enkephalin, folded structure of, 2313
8-Methyl adenine, hydrogen-bonding to uracil (thymine), 267
Methylation, effect on DNA stability of, 1697
Methylene blue, intercalated, quenching of, 307
Micellar systems, lysozyme conformation in, 1133
Microfibrils, β-chitin, high-resolution electron microscopy of, 1599
Minigastrin of des-trp^{1}, Asp$^{3-7}$, Lue^{12}, synthesis, CD, and activity of, 229
Mn^{2+} ions, distribution around poly(rI)·poly(rC) of, 1293
Molecular cartography of globular proteins, 863
Molecular dynamics of calmodulin conjugates at 37°C, 351
Molecular mechanics of netropsin-DNA interactions, 249
Molecular orbital calculations of the oligopeptides netropsin, distamycin, and related compounds, 2065
Molecular organization in agarose sulphate, 1009
Molecular structure of the *cis-syn* photodimer of d(TpT) (cyanoethyl ester), 1399
Molecular weight of cartilage proteoglycan, 1095
Mucous glycoproteins, conformation of, 1505
Multiple denaturation transitions in fibrillar collagen, 1875
Myoglobin clusters, 1109

NaCl, effect on RNA of, 91
—, effect on thrombin-heparin interaction of, 527
Netropsin, complexation to d(G-G-T-A-T-A-C-C) of, 707
—, interactions with DNA of, 249
—, molecular orbital calculations of, 2065
Nmr, of hydrophobic peptides, 1
—, ^{1}H-, spectrum of polypeptide toxin I, 489
—, ^{1}H-, of substance P fragments, 281
—, ^{23}Na-, of DNA-counterion exchange, 205
—, two-dimensional, of bacterial lipopeptide, 153
Novel peptide conformation, 2237
Nuclear Overhauser effect (NOE) NMR study on gramicidin S, 977
Nucleic acids, CD of, 1461
—, electric dichroism measurements of, 885
—, halogenated, effects on polyribonucleotide of, 571
—, -metal interactions, 1531
—, -spermine interactions, 375

Oligodeoxyribonucleotides, interaction of propidium with, 1997
Oligopeptide antibiotics, molecular orbital calculations on, 2065
Oligopeptide-oligonucleotide interactions, synthesis of peptide gels for the investigation of, 1055
Oligotripeptide, trimer model, influence on stability of the collagen triple helix of, 1081
Optical activity, of agarose, 959
—, of bacteriophage φ6, 171
Ovalbumin, gels, 31
—, solvent transfer enthalpy for, 119
Oxygen, partitioning to hemoglobin A_0 of carbon monoxide and, 1381
—, penetration of DNA helix, 307

Parallel double-helical structure, 1603
Peptide-bond distortions, 1087
Peptides, cytochrome *c* semisynthesis, 2269
—, distance determination on, 977
—, evolutionary similarity among, 1565
—, gels, synthesis of, 1055
—, membrane-active, interaction between membranes of, 1259
—, novel conformation of, 2237
Pf1 virus particle dynamics, 1859
Phase diagram for lysozyme crystalline and solution states, 337
Phospholipid membrane, molecular conformations and interactions with, 2293
Phosphorus nmr spectra of DNA fragments, 1803
cis-syn Photodimer of d(Tpt) (cyanoethyl ester), molecular structure of, 1399

Pinellin, conformational changes in solution of, 393
Plasma fibronectin, subunit arrangement in, 947
Polyacrylamide gels, rotational diffusion of short DNA fragments in, 2173
Polyamines, effect on ^{23}Na-DNA line widths of, 205
Poly(α-aminoisobutyric acid), structural studies of, 607
Polycationic amine, oligomers of, exhibiting positive extrinsic CD bands, 407
Poly[d(A-T)], conformational properties of, 823
Poly[d(A-T)] · poly[d(A-T)], ψ compaction of, 2133
Polydeoxynucleotides, energy transfer in, 2307
Poly[d(G)] · poly[d(C)], B-conformation of, base tilt of, 2333
Poly(dG-dC), fluorescence decay of ethidium bromide in presence of, 507
Poly[d(GC)] · poly[d(GC)], B-conformation of, base tilt of, 2333
Poly(dG-m^{5}dC) · poly(dG-m^{5}dC), low-salt Z-forms of, vacuum UVCD of, 519
Poly[d(G-T)] · poly[d(C-A)], conformational properties of, 823
Poly(L-DOPA) with pendant crown ethers, 189
Poly(L-lysine), in aqueous solution, 1751
—, helix → β conformational transition of, 2347
Poly(L-tyrosine), disordered-β transition in, determined by stopped-flow spectrometry, 1607
—, Helix-coil transition of, 5
—, vibrational CD of, 5
Polymer network, diffusion rate through, 811
Polynucleotide CD probe with oligomers of polycationic amine, 407
Polynucleotides, single-stranded, model for conformation of, 1419
2′5′-linked Polynucleotides, formation of a double-stranded helical structure by, 729
Polypentapeptide of elastin, temperature-correlated force and structure development of, 1939
Polypeptides, polypeptide toxin I, ^{1}H-nmr spectrum of, 489
—, prediction of native conformation of, 1547
—, sequential, containing arginine, 655
—, sequential, salt-induced conformational transition of, 61
—, sequential, synthesis and CD of, 61
Poly-L,D-proline, structural investigation of, 2227
Poly(rG-dC) · poly(rG-dC), low-salt Z-form of vacuum UVCD of, 519
Poly(rI) · poly(rC), distribution of Mn^{2+} around, 1293
Polyribonucleotides, effects of 5-fluorouracil on, 571
—, energy transfer in, 2307
Polysaccharides, chemical synthesis of, 1955
Porcine pancreatic secretory trypsin inhibitor (PSTI), kinetic binding to bovine β-trypsin of, 2323
Positive extrinsic CD bans, interactions with oligomers of, 407
Positron annihilation study of hydrated DNA, 1865
Potassium complex with L-DOPA-derived crown ethers, 189
Propidium interaction with oligodeoxyribonucleotides, 1997
Protein crystal, effect of pH and salt on growth of, 337
Protein folding, evolutionary similarity among peptide segments and, 1565
—, nonradiative energy transfer study, 235
Protein gels, heat-set, mechanical properties of, 31
Protein hydration of ion pairs, 317
Proteins, Ca^{2+}-binding, carbocyanine dye and, 1579
—, cytochrome *c* chimerae from natural and synthetic fragments, 2121
—, distribution of charged groups in, 1717
—, with DNA flexible coils, kinetics of nonspecific binding reactions of, 985
—, in fibrin fibers and fibrinogen polymers, 2373
—, folded, dielectric constant of, 2097
—, globular, intermolecular distances in, 235
—, globular, molecular cartography of, 863
—, globular, stability of, 1623
—, globular, three-dimensional structure of, 1109
—, island-model, folding-unfolding transition of, 1815
—, picosecond relaxations in model substances for, 677
—, secondary structure of, 469
—, solvent transfer enthalpies and, 119
structure and internal mobility of, 1909
—, structural class of, amino acid sequences and, 1659
Protein solutions, concentrated, SANS studies of, 1156
Proteoglycans, aggregate structure of, 931
—, cartilage, molecular weight of, 1095
Protofibrils, lateral packing of, 2357

Raman spectroscopic study on 5′-rGMP gel, 753
Reductive alkylation of bovine pancreatic trypsin inhibitor, 1644
Refractive index matching, protein in fibrin fibers and fibrinogen polymers determined by, 2373
Ribonuclease A, solvent transfer enthalpy and, 119
Ribonuclease-S-peptide, helix-coil thermal transition of, 1031
RNA, A-form, CD of, 91
—, A-form, of ϕ6 phage and nucleocapsid, 171
—, ethanol-salt condensation and, 91
—, ribosomal 5S, solution conformation of, 1299
—, synthetic, sequence-dependence of the CD of, 1735
—, from transition-moment parameters, CD of, 1461
—, Rotational diffusion of short DNA fragments in polyacrylamide gels, 2173

Scaled particle theory of high molecular weight DNA gels, 2017
Secondary structure of proteins by deconvolved FTIR spectra, 469
Sedimentation equilibrium analysis, 1095
Sequence-dependence of CD of synthetic RNA, 1735
Sequential polypeptides containing arginine, 655
Sickle hemoglobin gels, CD in soret region of, 1359
Silver(I) ions, effect on DNA of, 1531
Single-stranded polynucleotides, model for conformation of, 1419
Small-angle neutron scattering (SANS), studies of bovine serum albumin by, 1156
Sodium dodecyl sulfate, effect on melittin of, 1493
—, ^{1}H-nmr studies in, 2313
Sol-sol structural transition of aqueous agarose systems, 2254
Somatostatin in a methanol solution, conformational properties of, 1895
Soybean protein gels, mechanical properties of, 31
Spectrometry, stopped-flow, disordered-β transition in poly(L-tyrosine) by, 1607
Spermine-nucleic acid interactions, 375
Stacking interactions in dinucleoside monophosphates, 17
Stead-state fluorescence polarization, study of association of DNA fragments by, 1519
Substance P fragments, self-association and solubility of, 281
Supercoiled DNA, elastic model of, 2083

TATA segment of d(G-G-T-A-T-A-C-C) duplex, 693
Tetrapeptides, fibrinogen-binding, interaction with fibrin oligomers and fine fibrin clots of, 1315
Tetraproline derivatives, crystal structure and molecular conformation of, 2227
Thermal memory effect, use of dynamic light scattering to investigate, 1185
Thionine, adsorption on heparin of, 1273
Thioredoxin hairpin structures, models of, 555
Thrombin-heparin interaction, effect of NaCl on, 527
Trimer model oligotripeptide, influence on stability of collagen triple helix of, 1081
Tripeptides, analysis of collagen sequence and identification of, 1069

Ultrafiltration, study of adsorption of thionine on heparin by, 1273
Unfolding-folding transition of island-model proteins, 1815
Unfolding rate and structural fluctuations in lysozyme, 1981
Uv radiation, effect on DNA-Cu(II) complex of, 217

Vacuum CD spectra of poly(rG-dC) · poly(rG-dC) and poly(dG-m^{5}dC) · poly(dG-m^{5}dC), 519
Vibrational CD, of 3_{10}-helix octapeptides, 79
—, of poly(L-lysine) in aqueous solutions, 1751
—, of poly(L-tyrosine) in mixed solvents, 5
Viscoelastic properties of DNA, 291
Viscosity, specific, of calmodulin at 37°C, 351

Water-accessible surfaces, solvent-protein enthalpies and, 119
Water-biopolymer interactions, thermodynamics of, 1967

X-ray absorption near-edge spectroscopy (XANES) of DNA-Cu(II) complex, 217
X-ray diffraction analysis of N-benzylcarbonyl homo-tripeptide, 2237

Z-DNA, spectroscopic and electro-optic characterizations of, 2279
